DETAILED ACTION

Double Patenting

While the pending application is recognized as a divisional of application 10/043,629, the preliminary amendment to the claims has obviated the previous restriction requirement. Said preliminary amendment has put the pending claims in conflict with parent application 10/043,629 and its parent, U.S. Patent No. 6,707,561.

Claims 1, 2, 4-7, 10-18 and 29-46 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-34 of U.S. Patent No. 6,707,561. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-34 of '561 are broader in scope than pending claims 1, 2, 4-7, 10-18 and 29-46 and therefore already include the subject matter of the pending claims. Further, it would have been obvious to one of ordinary skill in the art at the time of invention that the sample platform of the pending claims is an obvious variation of the patented platform for use in sample analysis.
